

# Configuration

1. As a JIRA Administrator, select "Add-ons" and then navigate to the SMS Sender Configuration section on the left navigation bar.

The screenshot shows the JIRA Administration interface. The top navigation bar includes 'JIRA', 'Dashboards', 'Projects', 'Issues', and a 'Create' button. Below this is a search bar and a 'Administration' section with a search input. The left sidebar contains navigation links for 'Applications', 'Projects', 'Issues', 'Add-ons' (selected), 'User management', and 'System'. Under 'Add-ons', there are links for 'ATLASSIAN MARKETPLACE' (Find new add-ons, Manage add-ons, Purchased add-ons) and 'WORKFLOW' (SMS Sender Configuration). The main content area is titled 'SMS Sender Configuration' and contains the following fields: 'BulkSMS Credits Left' (1.50), 'BulkSMS Username' (akymas), 'BulkSMS Password' (masked with dots), 'Default receiver's phone number' (with an example +447797801009), 'Default text message' (text area), and 'Username phone property key'. A 'Save' button is at the bottom.

2. Enter BulkSMS account details. In addition to that, there is a possibility to enter default values of the receiver's phone number and a text message.
3. Click "Save" button. To make sure everything works fine, look at the "Credits Left" section. If you see a wrong value of credits, check account details.

## Notification Events

The screenshot shows the 'Notification Events' configuration page. It has three sections: 'Assignee changed', 'Priority changed', and 'Status changed'. Each section has three checkboxes: 'Assignee', 'Reporter', and 'Default user'. A 'Save' button is at the bottom.

4. The second form is for notification events.
