

# Send messages on workflow event

As a JIRA Administrator, select "Issues" in the admin dropdown menu and then navigate to the "Workflows" section on the left navigation bar. Choose the workflow scheme and navigate to the "Edit" link. Then choose transition and go to the "Post Functions" page.

Validators 1

Post Functions 3

The following will be processed after the transition occurs

Add post function

1. Creates the issue originally.

2. Re-index an issue to keep indexes in sync with the database.

3. Fire a **Issue Created** event that can be processed by the listeners.

Add post function to transition. Choose "Send SMS" post function and click on "Add".

<input type="radio"/>	Notify HipChat	Send a notification to one or more HipChat rooms.
<input checked="" type="radio"/>	Send SMS	Send SMS with default parameters or parameters defined in custom fields
<input type="radio"/>	Store Issue	Stores updates to an issue (no change history is created).
<input type="radio"/>	Trigger a Webhook	If this post-function is executed, JIRA will post the issue content in JSON format to the URL specified.
<input type="radio"/>	Update Issue Field	Updates a simple issue field to a given value.
<input type="radio"/>	Update Issue Status	Sets issue status to the linked status of the destination workflow step.
