

Send messages manually

To send messages manually, go to the issue page.

In dropdown menu "More" select link "Send SMS". You will be redirected to the "Send SMS" page.

A screenshot of the 'Send SMS' page. The header shows the 'Test Ticket' title and logo. Below the header, the page title 'Send SMS' is displayed. The main content area has a section 'Send SMS immediately' followed by two input fields: 'Reciever's phone number' (with a placeholder '(e.g. +44123456780)') and 'Text message'. At the bottom, there are two buttons: 'Send' and 'Cancel'.

Here you can define receiver's phone number and text message. If you have defined default values on the configuration page, you will see that values in input fields.

Click "Send" button, and a receiver will get the message.
